INSTYTUT PODSTAWOWYCH PROBLEMÓW TECHNIKI POLSKIEJ AKADEMII NAUK

# ARCHIWUM ELEKTROTECHNIKI

TOM XIII · ROCZNIK 1964

KWARTALNIK

### RADA REDAKCYJNA:

PROF. JANUSZ LECH JAKUBOWSKI, PROF. BOLESŁAW KONORSKI, PROF. IGNACY MALECKI, PROF. WITOLD NOWICKI, PROF. PAWEŁ SZULKIN

### KOMITET REDAKCYJNY:

Redaktor Naczelny Z-ca Redaktora Naczelnego Sekretarz PROF. JANUSZ GROSZKOWSKI PROF. PAWEŁ NOWACKI WACŁAW ZWOLAKOWSKI

#### ADRES REDAKCJI

Warszawa, ul. Koszykowa 75, Politechnika Zakład Radiotechniki, tel. 28.32.04 lub 28.87.40 Redakcja czynna: poniedziałki, środy i piątki godz. 17—19

## SPIS TREŚCI

	Ambroziak: Analityczne wyznaczenie oporności oporników dyfuzyjnych w półprzewod-	
	nikowych układach monolitycznych	28
S.	nikowych układach monolitycznych	48:
A.	Bragiński: Badanie stabilizacji ścian Blocha w ferrycie manganawo-żelazawym przy	
	temperaturach bliskich 273°K	82
K.	Brańska, A. Kwiatkowski, I. B. Puchalska: Zastosowanie mikroskopu elektrono-	
	wego do badań proszków ferromagnetycznych	69
A	Brochocki: Wpływ parowania domieszki podczas wytopu strefowego krzemu na jej	
		11
K	rozkład w monokrysztale	17
	Cholewicki: Nowa metoda obliczania pradów i napięć w linii długiej	339
	Ciok: Prady zwarciowe przy zwarciach niejednoczesnych w obwodach trójfazowych .	439
	Ciok: Doświadczalne sprawdzenie metodyki obliczania prądów przy zwarciach nie-	73.
	jednoczesnych	58
ST	Firkowicz: Niektóre zagadnienia statystycznej oceny niezawodności	159
	Firkowicz: Ocena stabilności cech mierzalnych lamp elektronowych metoda równo-	10.
DL	ważnej częstości uszkodzeń	411
T	C. Gille, S. Węgrzyn: Wystarczający warunek stabilności układów nieliniowych dru-	71
3.	giego rzędu	
K	H. Gothe, A. Smoliński: Efekt maserowy w rubinie w temperaturze ciekłego wodoru	713
	Góra: Metoda prognozy obciążeń systemu elektroenergetycznego z zastosowaniem	11.
٥.	matematycznych maszyn cyfrowych	385
Δ	Góral: Mechanizm procesów magnesowania a właściwości obwodowe rdzeni ferro-	30.
2 1.	magnetycznych	73
K	Grabowski: Uwagi o małosygnałowej analizie liniowej sieci elektrycznej z reaktancją	12
12.	okresowo zmienną w czasie	541
M	Grobelny: Czwórnik selektywny z neutralizacją rezonansową	353
M	Hering: Zastosowanie rachunku krakowianowego do wyznaczania rozkładu temperatur	33.
171.	w dwuwymiarowych elektrycznych układach grzejnych	555
T	Kacprowski: Synteza formantowa dźwięków samogłoskowych i nosowych. Podstawy	33.
	teoretyczne	661
7	Kaczkowski: Wielowarstwowy solenoid laboratoryjny	661
T	Kaczorek: O wypisywaniu układu równań różniczkowych w postaci normalnej opisu-	171
	jących przebiegi czasowe w obwodach liniowych	511
Т	Kaczorek: Zastosowanie metody symbolicznej Puchowa do wyznaczania przebiegów	. 311
-	czasowych w liniach długich	701
1	Klamka: Diody krzemowe ze stopowymi złączami p-n	761
I	Knoch, J. Myśliwiec: Metoda techniczna analizy generatora drgań sinusoidalnych	481
	na diodzie tunelowej	651
A	Kobus: Temperaturowe własności halotronów	651
7	Korzec: Analiza strat mocy przy przełączaniu tranzystora obciążonego opornością	291
- ·	czynna ze stanu odciecja o najwonia	
	czynną ze stanu odcięcia do nasycenia	51

Z. Korzec: Stany przejściowe w tranzystorach kluczowych przy obciążeniu czynno-induk-	
cyjnym	603
Z. Kosowicz: Określanie strat jałowych w mikromaszynach H. Kozłowska, H. Lachowicz, T. Tymosz: Natężenie powściągające cienkich warstw	591
Ni-Fe naparowywanych termicznie w próżni	173
L. Kubat: wspołczynnik przydatności dla systemów zwielokrotnienia równolegiego	43
J. F. Kulikowski: Metoda obliczania osiowych sił zwarciowych w transformatorach przystosowana do zaprogramowania na maszynę cyfrowa.	772
J. L. Kulikowski: O pewnym nieparametrycznym układzie detekcji sygnałów binarnych	773
J. L. Kulikowski: O klasie adaptujących się układów decyzyjnych optymalnych w sensie	13
bayesowskim	525
E. Kuźma: Charakterystyki mocowo-temperaturowe termistorów wykonanych z pewnych spieków tlenków manganu i kobaltu	715
E. Kuźma, B. Schmidt, J. Bekisz: Wstępne pomiary parametrów termistorowych de-	713
tektorów podczerwieni	720
B. Lisowski: Aparatura do badania dynamicznych właściwości cienkich warstw magnetycz-	477
nych	477
pamięciowych z dowolnie programowanym sekwensem impulsów magnesujących	180
B. Lisowski, H. Lachowicz: Generator impulsów nanosekundowych	183
J. Nasiłowski: Naskórkowość i powierzchniowe topnienie drutów	755
fonicznych z wybierakami krzyżowymi	797
A. Plucińska: Wyznaczenie pola rozrzutu funkcji wymiernej zmiennych losowych zespolo-	
nych oraz $\sqrt[k]{z}$	429
J. Pułtorak: Złącze p-n w warunkach ekskluzji i akumulacji nośników mniejszościowych	221
J. Sass: Magnetooptyczny efekt Faradaya w ferrytach itrowych	305 687
J. Sass: Badania struktury domenowej ferrytu itrowego	853
J. Sawicki: Czułość i dobór elementów odchyłkowego mostka Wheatstone'a	459
J. Sawicki: Charakterystyka pomiarowa wieloczujnikowego mostka Wheatstone'a	621
terystyk statycznych złącz półprzewodnikowych w szerokim zakresie pradów i napięć	724
S. Sikorski: Pole elektryczne objętościowego efektu fotowoltaicznego w półprzewodnikach	187
A. Świt: Komórka elektroluminoforowa z fotodiodą germanową jako nowy przetwornik promieniowania podczerwonego na widzialne	247
A. Świt: Przeciwsobnie połączone diody germanowe i komórka elektroluminoforwoa jako	241
półprzewodnik promieniowania podczerwonego na widzialne	677
R. Wadas: Wzbudzenie fal spinowych w ferrytach itrowych i niklowych	317
B. Wdowiak: Wybór gęstości prądu i kształtu twornika maszyny prądu stalego T. Zagajewski: Uogólniona zasadą dwoistości obwodów elektrycznych i niektóre jej zasto-	147
sowania	25
J. S. Zieliński: O obliczaniu przepięć wewnętrznych w układach elektroenergetycznych	10-
metodą charakterystyk	125
elektrycznych sinusoidalnie zmiennych	731
COURDINATURE	
СОДЕРЖАНИЕ	
А. Амброзяк: Аналитическое определение сопротивления диффузионных	
сопротивлений реостатов в полупроводниковых монолитных системах	281
С. Беллерт: Синтез четырёхполюсников методом структурных чисел	405
на вычислительных машинах	485
Мп—Fe вблизи 273° К	823
К. Браньска, А. Квятковски, И. Б. Пухальска: Иснользование	
электронного микроскопа для исследования ферромагнитных порошков	697
А. Брохоцки: Влияние испарения примеси во время зонной плавки кремния на ее распределение в монокристалле	111
к Буркевич: Магнитная паста для исследования доменовых структур	177
Р. Вадас: Возбуждение спиновых волн в итриевых и никелевых ферритах	317
Б. Вдовяк: Избрание оптимальных значений плотности тока и геоме-	1.00
трии якоря машины постоянного тока	147

n.	при температуре жидкого водорода	713
K	Грабовски: К вопросу о малосигнальном анализе контура с реак-	110
11.	тивностью изменяющейся во времени	541
M.	Гробельны: Активный селективный четырехполюсник с резонан-	
	сной нейтрализацией	353
C.	Гура: Прогноз нагрузок энергосистемы с применением счетно-реша-	
	ющих устройств	385
A.	Гураль: Механизм намагничивания и контурные свойства ферромаг-	
	нитных сердечников	73
Ю	. Жиданович: Амплитудно-фазовый компаратор для сравнивания	
	двух электрических синусоидально-переменных воличин	731
Ю	. Жиль, С. Венгжин: Достаточное условие стабильности нелиней-	
	ных систем второго порядка	3
T.	Загаевски: Обобщенный принцип двоичности электрических цепей	0.5
~	и некоторые его применения	25
C.	Зелински: Расчет внутренних перенапряжений в электроэнергети-	195
cr	ческих системах с применением метода характеристик	125
11.	Кацпровски: Формантовый синтез гласных и носовых звуков (Теоретические основы)	661
7	(Георетические основы)	171
	Качорек: О приведении к нормальному виду системы дифферен-	111
	циальных уравнений описывающих переходные процессы в линей-	
	ных цепях	511
T.	Качорек: Применение симболического метода Пухова для определе-	
	ния неустановившихся режимов в однородных длинных линиях	
	с распределенными параметрами	761
Л.	Кнох, Г. Мысливец: Технический метод анализа синусоидальных	
	колебаний генерируемых при помощи туннельного диода	651
	Кобус: Температурные свойства датчиков электродвижущей силы Холла	291
3.	Кожец: Анализ мощности рассеяния в переключающих триодах при	
n	активной нагрузке	51
3.	Кожец: Переходные процессы в переключающих полупроводниковых	200
~	триодах с индуктивно-омической нагрузкой	603
1.	тонких пленок Ni—Fe осаждаемых методом термического испаре-	
		173
E	ния в вакууме $K$ лямка: Кремневые диоды со сплавными $p-n$ переходами	481
	Косович: Определение потерь холостого хода в микродвигателях.	591
	Кубат: Коэффициент пригодности для различных методов параллель-	
	ной мультипликации	43
E.	Кузьма: Тепловые характеристики термисторов из некоторых агло-	
	мератов окислов марганца и кобалта	715
E.	Кузьма, Л. Шмидт, К. Бекиш: Ориентировочные замеры пара-	
-	метров термисторных детекторов инфракрасного излучения	720
E.	Ф. Куликовски: Метод расчета осевых усилий при внезапном ко-	
	ротком замыкании трансформаторов, приспособленный к запрограм-	773
10	мированию на вычисленную машину дискретного действия	110
10		15
10	ния радиолокационных сигналов  Л. Куликовски: О классе самонастраивающихся решающих схем,	. 10
10	оптимальных в байесовом смысле	525
Б.	Лисовски, Г. Ляхович: Прибор для исследования импульсных	
	свойств запоминающих сердечников при произвольно программиро-	
	ванной секвенции намагничивающих импульсов	180
	Лисовски, Г. Ляхович: Генератор наносекундных импульсов .	183
Б.	Лисовски: Аппаратура для исследования динамических свойств тон-	4 13
	ких магнитных пленок	477
H.	Насиловски: Поверхностный эффект и поверхностное плавление	
	проволок	755
A.	Пальчевски: Двухсекционные единичные системы групповых сту-	
	пеней в телефонных станциях с многократными координатными	70~
Λ	соединителями	797
A.	1.1	400
	комплексных переменных $\sqrt[\kappa]{z}$	429

основних поряж: Переход р—п в условиях эксклузии и аккумуляции не-	
ochobabia hocurejien toka	221
	221
and a microna .	459
Tomophicabile Aduante Division Andrew	409
Trimin Adi Whamin	001
	621
Е. Сасс: Магнитооптическое исследование доменной структуры итрие-	305
вого феррита	
Е. Сасс: Исследование доменной структуры итревого феррита	687
С. Секерски, Е. Столярски: Прибор для импульсного осциллогра-	853
финеского испетерования стативания для импульсного осциллогра-	
фического исследования статических характеристик полупроводнико-	
вых переходов в широких диапозонах изменения токов и напряжений	724
А. Свит: Германиевый фотодиод и электролюминофорный элемент — но-	
вый преобразователь инфракрасного излучения на видимое излучение	247
А. Свит: Встречно соединенные германиевые фотодиоды и электролю-	
минофорный элемент в качестве преобразователя инфракрасного	
излучения в видимое	677
с. Сикорски: Электрическое поле объемного фотовольтаического эф-	
фекта в полупроводниках	187
Ш. Фиркович: Некоторые вопросы статистической оценки належности	159
Ш. Фиркович: Оценка стабильности параметров дами метолом экви-	
валентной частоты отказов	411
М. Херинг: Применение исчисления краковянов для нахождения распре-	
деления температур в двухмерных электротермических системах .	555
Т. Холевицки: Новый метод исчисления токов и напряжений в ли-	
ниях электропередачи	339
3. Циок: Токи при неодновременных коротких замыканиях в трехфаз-	
ных сетях	439
3. Циок: Опытная проверка метода вычисления значений токов при	
неодновременных коротких замыканиях в трехфазных сетях	581
